DESCRIPTION
MuscleCoat is a 100% solids epoxy coating that can be applied to any vertical surface such as walls and is available in a variety of colors. MuscleCoat has better/longer protection than standard wall paint and is idea in food processing plants and car washes.

DIRECTIONS
1. Measure area to be coated.
2. Carefully remove the lid from the pail.
3. Remove the gallon can marked Part B from the cradle.
4. Remove the cradle from the pail and discard.
5. Carefully remove the lock ring from the gallon can and open the can.
6. Pour the entire contents of the Part B into the pail, Part A.
7. Using a drill motor and a mixer, blend material together for 2 minutes, carefully moving the drill around to ensure a good mix. There must be no visible Part B remaining after the mix.
8. Once the product has been mixed for 2 minutes, empty the entire contents of pail onto the floor to be coated. Spread with flat squeegee, back roll with roller. Do not over roll.
9. You will have 30 minutes to apply product to surface. Product will cure in pail in 35 to 40 minutes.

NOTE: Temperatures lower than 75 degrees will result in longer cure times while above 75 degrees will result in short cure times.

CAUTION
PLEASE REFER TO THE SDS SHEETS FOR MORE DETAILED PRECAUTIONARY MEASURES, HANDLING INSTRUCTIONS AND EMERGENCY PROCEDURES.

HMIS SYMBOL

FIRST-AID
EYES: Flush with copious amounts of water lifting lids and removing contact lenses to ensure complete irrigation. Get medical attention.
